

# AAI SPECIFICATIONS

DATE: 06-29-06

**MODEL NUMBER:** 407-664

**DESCRIPTION:** Jr. Training Bar

**GENERAL DIMENSIONS:** The dimensions for the Jr. Training Bar are 54" wide x 47" deep x 35"-53" tall (adjustable).

**CONSTRUCTION:** The bar is made of 1" od steel tubing with a wood laminate in the center section. The pistons are made of 1-1/4" square x 11ga. steel tubing drilled with holes 3" center to center. The uprights are made of 1-1/2" square x 14ga. steel tubing welded to a base made of 1-1/2" square x 11ga steel tubing with 1/2" rod braces. A spreader plate is made of 3/16" x 3-1/2" flat bar steel with two pieces of tubing welded on to allow the uprights to slide over and lock in place. The Jr. Turning Bar is powder-coated and baked.
